STATE OF ILLINOIS

ATTN: Bob Stone

Dear Mr. Stone:

Enclosed you will find a revised Part A permit application for Brighton Landfill. This application is being submitted in order to update Brighton Landfill's current Part A interim status. The last Part A revision occurred in March of '82 and it is our client's desire that minor changes and clarifications be made to their Part A prior to Part B call-in.

The revisions contained in this Part A application include the following:

1) The process code used to describe the type of treatment process planned for use in the waste treatment area has been changed from T01 to T04. This change is being made for the purpose of clarifying the nature of the treatment process planned for this facility. Code T01 does not sufficiently represent the nature of the treatment process, therefore the change to a more appropriate code (T04). The process design capacity amount previously listed for process code T01 remains the same for the new process code T04.

2) A brief description of the planned treatment process that Brighton Landfill intends to use for process code T04 is presented on page 2 of the application.

3) The list of code numbers pertaining to the hazardous waste streams (per 40 CFR Subpart D) that Brighton Landfill handles has been updated.

Handwritten initials or mark

Page 2

4) The estimates for the annual quantities of waste received per individual hazardous waste code number have been updated.

5) The process codes for the individual hazardous waste streams have been updated.

6) A clarification of the ownership of the property that makes up the site. At the present time approximately twenty-two acres of the site property are owned by Mr. Gene Evans. The remaining acreage (approximately 80 acres) is owned by Com-Pak Engineering, Inc. The President of Com-Pak Engineering, Inc. is Mr. Gene Evans. Brighton Landfill is the operator for all acreage at the site and is a subsidiary of Com-Pak Engineering, Inc.

7) The facility sketch has been updated to show:

i) the parts of the facility which are considered as "active" areas for the landfilling of hazardous waste, (NOTE: This area includes the acreage that was the subject of the re-design plan for parts of the facility. This re-design plan has received Illinois EPA approval via Supplemental Permit Number 1982-69 granted within the past year),

ii) a move of the locations for the planned Waste Treatment Area, Bulk Liquid Storage Area, and the Drum Storage Area to the area behind the facility office,

iii) the removal of the hazardous waste disposal cell which exists North of the facility office. (NOTE: It is planned that the contents of this disposal cell shall be removed and deposited into the active disposal area.)

None of the changes included in this Part A application revision constitutes a facility reconstruction where capital investment would exceed fifty percent of the capital cost of a comparable entirely new hazardous waste management facility.

Should there be any questions concerning this Part A revision or if you require that additional information be submitted, please contact me at this office.

Thank you.

Bob Stone

II. PROCESSES (continued)

C. SPACE FOR ADDITIONAL PROCESS CODES OR DESCRIBING OTHER PROCESSES (code _____) FOR EACH PROCESS ENTERED HERE

Description of planned treatment process for code T03

It is intended to blend "wet" waste materials, either liquids or semi-solids (sludges), with appropriate additives in order to form a solid by-product suitable for direct landfilling. It is anticipated that both hazardous and non-hazardous wastes can be managed so as to eliminate their "liquid" characteristic. It is also intended that hazardous wastes subjected to this treatment be rendered either non-hazardous or at least less hazardous. This will be accomplished through a physical binding of the hazardous components into a stable matrix of cement like material that: displays a relatively low permeability, retains moisture, reduces the exposed surface area of hazardous material available to "leach", and chemically ties-up leachable metals.

V. DESCRIPTION OF HAZARDOUS WASTES

A. EPA HAZARDOUS WASTE NUMBER -- Enter the four-digit number from 40 CFR, Subpart D for each listed hazardous waste you will handle. If you handle hazardous wastes which are not listed in 40 CFR, Subpart D, enter the four-digit number(s) from 40 CFR, Subpart C that describes the characteristic and/or the toxic contaminants of those hazardous wastes.

B. ESTIMATED ANNUAL QUANTITY -- For each listed waste entered in column A estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

C. UNIT OF MEASURE -- For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

PROCESSES

1. PROCESS CODES:

For listed hazardous waste: For each listed hazardous waste entered in column A select the code(s) from the list of process codes contained in Item I to indicate how the waste will be stored, treated, and/or disposed of at the facility.

For non-listed hazardous wastes: For each characteristic or toxic contaminant entered in column A, select the code(s) from the list of process codes contained in Item III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

Note: Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described above; (2) Enter "00" in the extreme right box of Item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code(s).

2. PROCESS DESCRIPTION: If a code is not listed for a process that will be used, describe the process in the space provided on the form.

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER -- Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

- Select one of the EPA Hazardous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
- In column A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In column D(2) on that line enter "included with above" and make no other entries on that line.
- Repeat step 2 for each other EPA Hazardous Waste Number that can be used to describe the hazardous waste.

EXAMPLE FOR COMPLETING ITEM IV (shown in line numbers X-1, X-2, X-3, and X-4 below) -- A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.
